TAXES

The prices specified for the products do not include V.A.T

JURISDICTION

The present General Sales conditions are developed under the Spanish law. In case of litigation, the jurisdiction correspond to the court of Barcelona, to solve any discrepancy that could arise from the General Condition of Sales.

Once again this year we present the new 2014 catalog, which is imbued with the essence of Aerobics and Fitness: quality, design and innovation. Aerobic & Fitness Group is a fitness company leader in the Spanish market with over 20 years of experience. We supply throughout Spain and internationally with a wide range of fitness products and accessories. We work hard searching, creating and testing for product improvement, efficiency and competitiveness within the market; carried out with an enthusiasm to enjoy every minute.

The Most significant points

"O'live Fitness" has now become a recognized brand. In 2013 we consolidated the brand nationally and we launched it internationally with a fantastic response. We have developed a range of quality products with an unbeatable value for money, a homogeneous colour line that boosts the functional designs of its phenolic furniture, unique in the market. The range of products O'live Fitness continues its development, which you will soon be able to check out.

Our brand, **O'LIVE FITNESS** is thought to fulfill our client's requirements and the market specifications in functionality, quality, comfort, ability and diversity; always providing customer focused solutions. The products, designed in Barcelona, offer solutions to a wide range of categories within the Fitness industry such as: Studio, Performance, Body Mind, Combat, Free Weight or Speed & Agility.

Among the range of our products appearing in this catalog, those related to "Functional Training" are particularly noteworthy because of their involvement in the current economic climate. Some have been improved, some are brand new, and together these products are here to strengthen and expand the supply in this area of new training trends.

"Stations, Benches & Racks" is the name of the new family of benches, racks and free weights stations: a complete high performance and ergonomically designed range of products to kit out an entire free-weight area; quality equipment at affordable prices. You will be surprised; it is worth having a look at.

PurMotionTM, an innovative brand in functional training, offers its products integrated within the Functional Training Stations through great packaging and versatility. Whatever your needs, PurmotionTM can supply areas dedicated to functional training. The products and the training are complete, effective and fun thanks to its methodology and principles.

We also provide the necessary support by providing training sessions and educational programs with the best leaders in the field. With professionalism and enthusiasm, we have dedicated one more year to give you the best at the best price. Our passion is to provide the best solutions for the fitness industry, so we hope you will find what you need. We are always happy to help you.

Enjoy!

FITNESS BALLS

Fitness balls or Swiss balls have already become an indispensable product in any training program. They are used in various workouts such as body mind, personal training or rehabilitation. They are useful in balance work, core strengthening, flexibility and co-ordination as they can be very versatile and functional.

An important factor to consider when purchasing a fitness ball is its anti-burst capacity. This means that in case of accidental damage due to small cuts or punctures it will slowly deflate providing greater user safety.

The overall quality of a fitness ball can be determined by several factors: some materials provide a softer touch than others. The thickness will also affect the circular uniformity of the ball and all this will also determine its possible deformation, wear and tear or maximum load when in use. This last element is important if we want to use the fitness ball with weighted elements such as dumbells or discs.

The **O'live Exercise ball** is a high quality professional ball made of PVC and with anti-burst features. With CE certificate, it has a smooth surface. In case of accidental damage due to small cuts or punctures it will slowly deflate providing greater user safety. It is great value for money which makes it ideal for group classes.

The **O'live Fitness Ball** is manufactured using the exclusive material flexton silpower * (patent), which provides a nice soft velvety surface. In case of accidental damage due to small cuts or punctures it will slowly deflate providing greater user safety. It is manufactured in Europe and has CE certificate. The maximum load is 400 kg.

The **Loumet Fitness ball Pro** is one of the most reliable, safe and durable balls in the market. The Loumet manufacturing approach is making premium quality balls that in terms of their strength, deformation, wear & tear and ability to return to its original form, always reach the highest standards. The Loumet Pro outperforms its competitors while providing a nice texture and high satisfaction. Its burst strength goes up to 350 kg static, being useful for dumbell training.

The **Stediball** is a high quality ball filled with 1 kg of specially selected material and designed to move in different directions. It can be used both on the ground and in the air. When you lift and move the Stediball, its interior material moves freely to activate core muscles and stabilizers in a new and challenging way. The weight of the material inside the Stediball allows unique exercises, dynamic routines and improves performance while increasing stability and security as it is stable on the floor. The fact that it does not move freely Stediball makes it ideal for gyms, clinics and studios. It comes with an exercise book for a quick start. The Stediball is burst-resistant of up to 150 kg.

O'LIVE 4 BALL COMPACT RACK

It is suitable for storing of up to 4 fitness ball. It is screwed into the wall at the desired height.

Reference:	MU09400
Dimensions:	42 x 15 x 292 cm

O'LIVE 12 BALL RACK

Rack made of oval steel tube suitable for storing 12 fitness balls. Balls not included. The 75cm fitness balls only fit on the top shelf.

Reference:	MU06900	
Capacity:	12 balls	
Colour:	Grey	
Dimensions:	65 x 270 x 180 cm.	

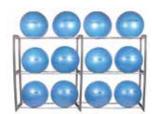

O'LIVE FITNESS BALL COMPACT RACK

Rack made of compact material panel suitable for storing fitness balls.

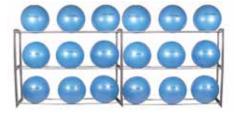

MU01600 Dimensions: 175 x 149 x 45cm. Capacity: 6 balls

O'LIVE TORNADO

Increase training opportunities by adding the Tornado, a versatile product that lets you diversify and redesign your Power Disk sessions. It allows you to introduce rotational exercises to the classic training programmes with bars and disks. It offers such a wide range of possibilities that you can do without traditional exercises and program new sessions focusing on core strengthening functional exercises, agility, coordination and balance workouts.

The Tornado uses disks and bars commonly utilised in gyms and sports centres to help develop its role. Its size is compact and does not take up too much space. For proper floor support and optimal functioning during the sessions, it is recommended to use disks with greater weight in their pivot point to prevent displacement. Two discs of 5 kg or one of 10 kg are recommended for this purpose.

During the Tornado session a great variety of exercises can be performed by users regardless of their physical condition. At the top of the bar each user determines the level of difficulty by adding the remaining disks from the Power Disk set.

The classic workout done in sessions with bars and disks focuses mainly on strength endurance and cardiovascular work; core stabilizing muscles of the body are partly forgotten. This muscle group is thoroughly worked with the Tornado, adding new possibilities in core strengthening training by performing all kinds of functional exercises.

KETTLEBELLS

Kettlebell are weights made of iron that resemble a cannonball with a handle. Its unique shape results in their centre of gravity to be slightly offset from the grip, making them ideal when performing ballistic exercises.

The Kettlebells are used for different fitness goals such as losing weight, gaining muscle, or for strength development. They are one of the most flexible and effective functional training products available today. are used in training programs that include explosive movements which combine cardio and strength workouts. Thanks to its displaced centre of gravity the kettlebells are harder to control, resulting in increased demands of agility, trunk stabilization and co-ordination.

O'live Fitness offers three different types of Kettlebells. Depending on their design and their usage some models can be more suitable than others.

O'live Cast Iron Kettlebells. They are made entirely of cast iron with a paint finish. Their handle is slightly grooved, and they look rather coarse but weight identification provided by the colour makes them very easy to use. They have a totally flat base that affords them with great stability, making them very useful for certain exercises: for example, they are perfect for Crossfit applications and in traditional fitness rooms.

O'live Vinyl Kettlebells. They are also made of cast iron, but they incorporate a colour coating which simplifies weight identification and provides extra protection with a less aggressive design. For these reasons the vinyl Kettlebells are commonly used in studio class activities or in female environments.

O'live Rubber Kettlebells. They feature a chromed steel handle and rubber coating which is stronger than vinyl. They have an elegant look that can be combined with other products from O'live Fitness such as dumbells and discs, providing a unified free weight area. The handle is completely smooth, and soft to the touch. They are commonly used in fitness centres and in personal training spaces.

MATS

To be able to choose the best mat we need to look into the context into which it might be used. There are special mats for yoga, pilates, martial arts, stretches or general fitness. The differences lie in the materials used, the available sizes and the thicknesses among other features; always matching the mat's functionality to the required use.

General Fitness Mats. The mats for general use have other features that make them ideal for cardio, stretches, crunches or any other workout that might require the protection of hands, back or knees. The materials used, and the dimensions of the mats, will determine their characteristics, which can be quite different from one another.

- O'live Vynil Mats. Made of PVC, one side is non-slip whilst the other side is smooth. They are 9,5 mm thick with a rather soft touch and their dimensions are small. These characteristics make them light and easy to clean, as well as suitable for general use in studio class activities and fitness rooms.
- O'live Freeflex Mats. Its composition gives them a soft and pleasant feel. They have got "Sanitized" certification; have an excellent grip on the ground while its grooved surface prevents the user from slipping. They are suitable for general use, but they are especially adequate for environments dedicated to personal training, body mind, stretching, etc...
- O'live Eva Mats. Made of EVA foam, which gives the mats excellent durability properties, their size and thickness make them ideal for a variety of uses; and perhaps for this reason they are the most versatile mats in the market. They have a smooth underside for increased grip and a grooved non-slip upper side. They are suitable for general use, in studio class activities and in fitness rooms.

O'live Yoga Mats. Typically made of PVC, yoga mats are thin in order to provide a light padding while "feeling" the contact with the floor, a necessary feature in traditional exercises. They have a slightly grooved surface to make them non-slip and its long measurements are ideal to accommodate the entire body.

O'live Pilates Mats. As in yoga, pilates workouts also require an elongated mat to accommodate the whole body, but in this case it is necessary to increase the level of comfort, it is for this reason that the mats are thick and cushioned. The material used is also different; typically NBR foam is used for this type of mat. One side of the mat is smooth to allow a good grip on the floor while the other side is grooved to prevent the user from sliding.

O'live Fitness Mats. With the same material and characteristics as the Freeflex Mats, the O'live Fitness Mats are bigger. They are hygienic, adherent, non-slip and soft to touch. They are suitable for rehabilitation environments and stretching activities.

FUNCTIONAL	DESIGN	CUSTOMISABLE	COMPACT
The material is stored in an orderly and accessible way.	It is made of steel with a decorative panel known as Compact hpl. It is freestanding, resistant, hygienic and easy to clean.	The panel design allows for the possibility of customizing the rack with the Club's or Sports Centre's corporate image using vinyl stickers.	Its reduced size allows for a gain of available space in the room.

O'LIVE SLIDERS

The O'live Sliders are a versatile product that can be used in a stand-alone Slider class or in an existing class format. They provide an unstable training surface that allows you to simulate many slideboard exercises. You can work multiple muscles while engaging core stabilization throughout the range of motion; they transform exercise movements into smooth, graceful lines of flowing motion.

- Provides a new stand alone group format class.
- Enhances your existing class format.
- Diversifies your choreography.
- · Incorporates balance, flexibility, strength, core and cardio drills.
- · A perfect addition on personal training sessions.

Unit:	1 pair	10 pair	25 pair + storage bag

O'LIVE O'BOUND

Jumping on a mini trampoline is a high intensity training but with zero impact and no damage to the joints. Training is very simple, effective and fun. When rebounding all parts of the body are involved, including all voluntary and involuntary muscles. The continuous bounce movement provided by the flexible Mat of the rebounder has multiple health benefits, from building strength and providing a cardio vascular workout, to accelerating the flow of our lymphatic fluid, which means for faster detoxing. The rebounder can also be used to exercise the brain, through a series of co-ordination movements requiring high levels of concentration. Rebounding exercises also assist with balance and co-ordination due to the flexible and thus unstable surface, which ensures that your balance is checked and corrected all the time. The O'live O'bound can be stored on top of each other using less space.

Reference: ST18700 Dimensions: 100 cm x ø 24 cm

TRIMILIN REBOUNDER

This is a high quality rebounder with a particularly durable canvas, high quality springs and excellent overall manufacture. It is made of anti abrasive materials and plastic plugs that leave no trace or marks. It also incorporates a padded coating that not only is nice looking but also serves to protect the user from injury. Made in Europe.

Reference:	ST05400
Dimensions:	102cm x 24cm.

O'LIVE FLEX BAR

The Flex bar is a glass fibre bar with rubber weights at both ends. The bar is 160cm long and weighs about 0.5 kg. Balancing the bar causes vibrations that stimulate the deep muscles of your body. The benefits are weight loss, overall fitness improvement and greater abdominal strength.

Reference: EN19200

O'LIVE FLEX BAR COMPACT RACK

Wall rack made of compact material suitable for storing up to 20 Flex bars. Flex bars not included.

Reference:	MU09800
Dimensions:	79 x 11 x 1 cm.

O'LIVE BOSU COMPACT RACK

Rack suitable for storing Bosu each with its corresponding slot for proper positioning.

O'LIVE ROPE SUSPENSION RINGS

The suspension rings are lightweight and portable and can be setup in seconds. They are useful for dozens of exercises, from the basics like push-ups to more difficult ones like Iron Crosses or Dips. They are made of nylon rope and they have a nylon adjustable strap with numbering. The rope diameter is 38mm and the rings diameter is 315mm.

Reference: EN33400

O'LIVE AB-STRAPS

You can quickly connect a pair of heavy duty performance Ab-Straps to any standard pull-up bar for ab defining workouts the way the pros do it. Experienced professionals use Ab-Straps to perform off-the-floor crunches and leg lifts. O'live Ab-Straps are sturdy, comfortable and designed for years of performance.

Made with heavy-duty nylon straps, mountain steel carabiners, and thick foam padding, the O'live Ab-Straps are both durable and comfortable.

Reference: EN33500

The pull-up is a great upper body exercise that involves back, shoulders and abdominals, while developing gripping strength. The rope allows different hand positions to increase gripping demand and provide a more natural line of pull.

The pull-up rope can be used for a varity of exercises: for example it can be looped around the handle of a kettlebell to increase the lever length and help teaching proper exercise execution, or it can be also attached to a Power Band. The rope can be used for upper body pulling and pushing exercises along with a number of other rotational exercises.

WEIGHTED BALLS

Training with medicine balls is common in athletes that want to improve their athletic performance. They have become increasingly popular among professionals because of its benefits when incorporated into a fitness program focusing strength, power or during rehabilitation.

Depending on use and the type of exercises to be performed, some balls are more suitable than others. Their endurance, touch, weight and size vary according to their function.

O'live Medicine Balls and Medicine Balls with Handles

They are suitable when throwing and bouncing against the ground isn't required. Made of rubber, their weight does not exceed 10 kg. This will prevent the wear of the shell and inhibit breakage. Its surface is slightly grooved for optimum grip and its dimensions are reduced. The medicine ball with handles allow different functional exercises.

O'live Functional Balls

The Functional balls are larger with a textile surface, which is soft and pleasant to touch. Its main feature is impact absorption which facilitates continued use by several users. They have been used by boxers when concentrating in core and abdominal training. Although they can be used in a variety of exercises, they are ideal when users throw the ball to each other in movements involving trunk stabilization, as well as shooting against the wall. They don't rebound. They are suitable for crossfit and high intensity workouts.

O'live Slam Balls

The Slam balls are made of rubber with sand inside to provide a high weight. They are much more durable than traditional medicine balls and they can be thrown hard to the ground without fear of breakage. They don't rebound. Its non-slip texture is similar to the medicine ball. They are suitable for Crossfit and in high intensity workouts.

Loumet Gymballs

Built in one piece, the Loumet Gymballs are extremely robust and durable medicine balls. They are very hard to wear when thrown to any surface and their texture and appearance is pleasant. They are water resistant so they can be used outdoors and in swimming pools. Due to its bouncing capabilities it is a very versatile ball.

FUNCTIONAL	The material is stored in an orderly and accessible way.
DESIGN	It is made of steel with a decorative panel known as Compact hpl. It is freestanding, resistant, hygienic and easy to clean.
CUSTOMISABLE	The panel design allows for the possibility of customizing the rack with the Club's or Sports Centre's corporate image using vinyl stickers.
COMPACT	Its reduced size allows for a gain of available space in the room.

O'LIVE FUNCTIONAL BAG

It is used to improve strength, muscle endurance, and power. It is a great product for energy expenditure and metabolic acceleration and it used in weight loss programmes. It can be tossed and caught like the medicine balls can, and they are useful in co-ordination, proprioception and core stabilisation workouts.

- Made of tough, firm and strong high quality synthetic leather.
- · Colour coded for easy weight identification.
- · Compact size to increase functionality.
- 6 Rubber handles for added versatility during exercise.
- · Supplied with inner sand and foam padding.
- Removable weight identification covers allow future weight changes for new updates.

Colour:	Grey
Dimensions:	75 x 120 x 90 cm

O'LIVE BATTLE ROPES
The benefit of training with combat ropes is double: They provide an intense cardiovascular workout while working gripping strength and upper body endurance. Another benefit associated with battle rope training is the important role the core is playing in coordinating and maintaining movement execution.

Yet another advantatge is the fact that it does not require a high level of skill or physical condition; basic instructions are enough to get started.

The O'live battle rope is made of 38 mm safe and non-abrasive black braided nylon and PP. The ends incorporate a heatseal finish that prevents the rope from fraying and provides comfort.

Length:	9 m	12 m	15 m

O'LIVE BATTLE ROPE WITH NYLON COVER

Reference:	EN34301	EN34302	EN34303	
Length:	9 m	12 m	15 m	

ROPE TRAINING & ANCHORING GUIDELINES:

- Training Surface Training on rough or abrasive surfaces will cause major friction and can damage ropes. This is not the recommended use and is not covered by warranty. We recommend training on smooth surfaces such as training mats, hardwood flooring, rubberized flooring or carpets.
- Fraying Slight surface fraying can happen with regular use depending on the training surface used. This type of fraying is normal wear and tear and will not affect the rope. Any other major fraying is usually caused by improper wrapping. We do not warranty any rope against fraying.
- Wrapping If wrapping ropes, do so only around a smooth, round surface. A square, abrasive or sharp edge will cause rope to be cut and frayed and nullifies the warranty.
- Anchoring The recommended method for anchoring all ropes is to use our inexpensive Rope Protector. This will protect your rope from damage.
- Covered ropes are designed and warranted for indoor use only on non-abrasive, smooth surfaces.
- Do not wrap a covered rope around a pole or other object as this will damage your cover. Friction burns are not covered by warranty.

O'LIVE CLIMBING ROPE

The Climbing rope incorporates a metal locking ring at one end that allows anchoring of the rope to the ceiling or a wall mount. With a diameter of 38 mm, it is made of sisal string for optimal grip.

Reference:	ST14400
Dimensions:	38 mm x 6 m

O'LIVE ROPE ANCHOR

Floor or wall bracket suitable for battle ropes and other products that need an attachment point like Resist battle ropes, speed resistors, etc. The tube is made of stainless steel and provides less wear on the ropes during use.

Wall bracket suitable for storing the training rope into a loop.

Reference:	MU10100
Dimensions:	70 X 15 X 18 cm

O'LIVE BATTLE ROPE ANCHORING PROTECTOR

The rope anchoring protector is an essential element when using battle ropes. It protects the battle rope from friction and fraying and increases the overall length for added difficulty. It is resistant, durable, effective and inexpensive and will increase the life span of the battle rope.

It is easy to adjust and remove with the use of Velcro straps and it fits any battle rope diameter.

The kit includes a protector, two straps and one carabiner.

PLYOMETRIC PLATFORMS / BOXES

O'live fitness offers a range of different models of plyometric platforms according to the needs and preferences of each centre or user.

The most common ones are the **plyometric platforms made of steel tube**. They are lightweight and trapezoidal and can be stored one on top the other without taking up much space. On top of this they feature a rubber surface for superior grip and cushioning. It is ideal for consecutive jumps at different heights.

Foam platforms are indicated when safety is the premise. Such a soft material minimises the consequences of possible stumbling. For this reason they are normally used to perform explosive jumps at great height or for the less experienced user. They are available in different heights and they can be stacked one on top of the other and held together with Velcro.

Another available model is the **plyometric wooden box**. A key feature is the ability to adjust its height. Depending on which side it is positioned, it allows three different heights: 50 cm, 60 cm or 75 cm. This type of plyometric box is commonly used in Crossfit and it is also suitable for other types of exercises which require a high base.

O'LIVE WOOD ADJUSTABLE PLYOMETRIC BOX

CrossRope is a full 'Jump Rope System'; and there is nothing like it. Imagine that you had to do an entire workout with a single weight. It may be too light or perhaps too heavy, but you can't change the weight. That's what having a regular jump rope is like. With CrossRope, you can easily change the weight of your jump rope by snapping out one of seven different weights of the rope. Not only does this enhance your training versatility, it will make you a better jump-roper and can increase your strength, co-ordination, and fitness guicker and more effectively.

The ball bearing handles ensure that the heaviest rope rotates as smoothly as the lightest; so these ropes will spin as fast as you can move them!

HANDLES

QUICK HANDLES

The CrossRope Quick Handles are the lighter version of the two CrossRope handle variants. Their narrower grip is favorable for good jumping control with the lighter CrossRope handles, yet they are heavy and durable enough to withstand the strain of heavy rope cables. These handles are included in the CrossRope Solo Light, Swift Set, and Complete Set combos.

- The lighter, thinner options of the CrossRope handle choices. (Total weight: 212,62 gr.)
- Durably Mounted ball bearings ensuring smooth, consistent rotation for all CrossRope cables.
- Innovative, yet simple clip attachment enables you to easily interchange all seven CrossRope cable for unparalleled jump rope training.
- $\bullet \ \ \text{Intended primarily for use with Sprint, Speed, Stamina, and Explode cables.}$

Reference: EN35200

RUGGED HANDLES

The CrossRope Rugged Handles are the heavier version of the two CrossRope handle variants. The thicker handle is favorable for good grip strength and leverage when training with the heavier CrossRopes. These handles are included in the CrossRope Solo Heavy, Brute Set, and Complete Set combos.

- The heavier, larger grip options of the CrossRope handle choices. (Total weight: 311.84 gr.)
- Durably mounted ball bearings ensuring smooth, consistent rotation for all CrossRope cables.
- Innovative, yet simple clip attachment enables you to easily interchange all seven CrossRope cables for unparalleled jump rope training.
- Intended primarily for use with the Explode cable, Power cable, Strength cable, and Titan cable.

CABLES

· Sprint cable: 56,7 g. Green nylon coated steel. This is the lightest and fastest CrossRope cable. It is geared toward advanced jumpers. · Speed cable: 82,21 g. Red nylon coated steel. This is a great all-purpose speed rope. Great for cardio or speed skills like double unders.

• Stamina cable: 147,42 g. Blue nylon coated steel. This is our 'Heavy speed rope'. Very fast, yet three to four times as heavy as a standard speed rope.

It is great for beginners.

Transparent red PVC coated steel. It is a mid-weight rope (light/heavy rope) that is heavy enough for upper body conditioning, · Explode cable: 340 g.

but light enough for beginners.

Yellow PVC coated steel. A great general use heavy rope for beginners or for more experienced jumpers who are looking to develop · Power cable: 567 g.

jump rope power.

· Strength cable: 907,2 g. Black PVC coated steel. This is an intermediate heavy rope for larger individuals or individuals that have previous heavy rope

experience.

· Titan cable: 1360,78 g. Clear PVC coated steel. The ultimate upper body jump rope workout tool. This rope is great for short, intense intervals and it is

an excellent workout challenge for any individual.

FITNESS BALLS

Fitness balls or Swiss balls have already become an indispensable product in any training program. They are used in various workouts such as body mind, personal training or rehabilitation. They are useful in balance work, core strengthening, flexibility and co-ordination as they can be very versatile and functional.

An important factor to consider when purchasing a fitness ball is its *anti-burst* capacity. This means that in case of accidental damage due to small cuts or punctures it will slowly deflate providing greater user safety.

The overall quality of a fitness ball can be determined by several factors: some materials provide a softer touch than others. The thickness will also affect the circular uniformity of the ball and all this will also determine its possible deformation, wear and tear or maximum load when in use. This last element is important if we want to use the fitness ball with weighted elements such as dumbells or discs.

The **O'live Exercise ball** is a high quality professional ball made of PVC and with anti-burst features. With CE certificate, it has a smooth surface. In case of accidental damage due to small cuts or punctures it will slowly deflate providing greater user safety. It is great value for money which makes it ideal for group classes.

The **O'live Fitness Ball** is manufactured using the exclusive material flexton silpower * (patent), which provides a nice soft velvety surface. In case of accidental damage due to small cuts or punctures it will slowly deflate providing greater user safety. It is manufactured in Europe and has CE certificate. The maximum load is 400 kg.

The **Loumet Fitness ball** Pro is one of the most reliable, safe and durable balls in the market. The Loumet manufacturing approach is making premium quality balls that in terms of their strength, deformation, wear & tear and ability to return to its original form, always reach the highest standards. The Loumet Pro outperforms its competitors while providing a nice texture and high satisfaction. Its burst strength goes up to 350 kg static, being useful for dumbell training.

The **Stediball** is a high quality ball filled with 1 kg of specially selected material and designed to move in different directions. It can be used both on the ground and in the air. When you lift and move the Stediball, its interior material moves freely to activate core muscles and stabilizers in a new and challenging way. The weight of the material inside the Stediball allows unique exercises, dynamic routines and improves performance while increasing stability and security as it is stable on the floor. The fact that it does not move freely Stediball makes it ideal for gyms, clinics and studios. It comes with an exercise book for a quick start. The Stediball is burst-resistant of up to 150 kg.

FLOWIN SPORT

The Flowin concept consists of functional exercises focusing on core stability, mobility, strength, balance, speed and power. By using a rectangular base plate and various pads effective friction is generated in this training that can be adjusted safely by the user by simply altering the degree of pressure. Using their own bodyweight as counterweight users can regulate the degree of friction and thus the difficulty level.

Sport models are suitable for the end consumer. The plate can be rolled and includes a carry bag, 5 pads (2 x foot pads, 2 x hand pads and 1 x knee pad), a manual and a DVD with three different training programs.

O'LIVE WEIGHT VEST

Vests are useful to increase load during cardio-vascular exercises, for plyometric and agility drills and body-weight exercises. The O'live weight vest is rugged, durable with fully adjustable strap to ensure it fits perfectly to your torso. The Vest is weighted with 1.1kg weights, each of which is secured snugly into its own Velcro pocket.

The 10 kg vest has got 5 pockets on the front and 4 on the back to ensure even weight distribution. You can quickly and easily load or unload the vest to suit your needs.

The 20 kg vest has got 9 pockets on the front and 9 on the back to ensure even weight distribution. You can quickly and easily load or unload the vest to suit your needs.

Weight: 1	10 kg	20 kg

O'LIVE PRO PUSH UP BARS

Push-ups are an effective upper-body exercise that builds muscular strength and endurance in the chest, shoulders and triceps. The Push-up bar offers a way to alter the classic style increasing intensity and helping with the discomfort sometimes experienced with these types of exercises.

The O'live Pro Push-up bars will help you neutralize the wrist angle so there is less pressure on the joints. Without that pain, you might be able to perform more push-ups than you normally might, with your palms flat on the floor.

- · Designed to relieve stress on your wrists and hands.
- Sturdy steel structure for comercial use.
- Durable Vinyl handles which provide greater user comfort.
- Round shaped with rubber base for maximum stability and grip.

Reference: EN36300

O'LIVE TRIPLE JUMP ROPE

With a new handle design and addition of a metal pin we have developed a resistant product that will last for many years. Jumpers use this type of rope to jump 5-6 times per second. It turns exceptionally well and it is very light allowing not only for fast jumps but also allows the user to perform double and triple jumps. You can easily adjust the length.

Reference:	ST14300
Colour:	Black

O'LIVE RUSSIAN BELT

The Russian belt is a very simple to use product. You must have a support (Wall bar, bracket) allowing static and dynamic exercises for lower body strength: femoral biceps area, quadriceps and hamstrings. You can perform unconventional exercise positions aiding recovery, preventing injures, and improving strength and flexibility.

The O'live Russian belt is manufactured in neoprene which does not absorb moisture, and includes a metal buckle for quick and easy adjustment adding versatility and comfort.

Reference: EN29100

O'LIVE INTERVAL TIMER

The Interval Timer satisfys the needs of any gym or boxing area, as it lets you forget about counting and allowing you to focuse on the training. It comes in an aluminium case and it needs a 220v socket, it can be hung onto a wall displaying LED lights viewed full 180 degree for maximum angle vision.

- · Remote controlled
- · Count Up function
- Count Down function
- Stop Watch function
- Interval Training function
- You can program and save your top seven intervals for quick operation in the future
- Audible beeper to start, pause, and end intervals and workouts.
- 24 hour clock displayed when the timer is not in use. Seconds are displayed so anyone in the gym can run their own interval training session without the need to have individual control of the clock.

LOUMET BALANCE BOARD

Unlike traditional balance boards, the Loumet balance board incorporates a non-slip circular relief on the surface for increased gripping capacity. In addition, its slightly convex shape allows greater user support. The rounded corners allow a safe hand use when doing ground work.

The Loumet balance board is built in one piece, making it extremely durable, strong, resilient and able to withstand up to 350 kg.

Reference: EN29000 Colour: Blue

BALANCE BOARD POSTER O'LIVE

O'LIVE SPEED RESIST KIT

Set consisting of a 6 meter Elastic Resist, a Resist harness, an anchor strap, two Carabineers and a storage bag.

The speed resistor is designed to help athletes accelerate faster and with greater power. The more the elastic cord is stretched, the more resistance it will provide to the user in their advancing motion. The elastic is 6 meters long and it can reach a maximum length of 12 meters.

Reference:	EL11700	EL12100
Intensity:	48 kg	35 kg

Autonomous and easily movable with four different rotating anchoring points which can be positioned at different heights, allowing a wide variety of workouts and exercises. It has several elastic tubes of different resilience which permits up to 10 users working simultaneously. With the GroupPole you can exercise all muscle groups thanks to the different grip options available. It is very stable and completely mobile. It has wheels and accessories that greatly facilitate its movement. It has unlimited training options, including 360 ° degree rotation. It includes 4 rotating anchoring points for tube attachment, facilitating a variety of both upper body and lower body exercises achieving a cardiovascular, toning and flexibility workout.

Anyone can work at the GroupPole regardless of age and physical condition; it is also suitable for disabled users. Its circular format encourages group activity by promoting interaction and learning exercises without mirrors. It is therefore very useful in group sessions for up to 10 users and for personal training. The workouts can be done face-to-face, back-to-back or turning on the axis of the GroupPole, providing diversification and widening training opportunities. The traditional classroom environment changes with greater dynamism and interaction. The experience it is always very positive for participants.

The GroupPole comes with 14 medium intensity elastic tubes, 4 strong intensity elastic tubes and 2 light intensity elastic tubes, all of them with their grip handles. It can incorporate optional accessories like the Resist belt, the Resist ankle strap or the Reist bar.

GroupPole needs to be filled with dry sand grain to ensure stabilization. *It does not include sand.*

GROUPPOLE KIT

Includes:

- 1 GroupPole
- 20 elastic tubes (14 medium, 2 light & 4 strong intensity)
- 20 tube handles

Reference: ST00200

GROUPPOLE ADVANCE KIT

Includes:

- 1 GroupPole
- 20 elastic tubes (14 medium, 2 light & 4 strong intensity)
- 20 tube handles
- 10 Resist bars

Reference: ST00300

GROUPPOLE COMPLETE KIT

Includes:

- 1 GroupPole
- 20 elastic tubes (14 medium, 2 light & 4 strong intensity)
- 20 tube handles
- 10 Resist bars
- 10 Resist belts
- 10 Resist Ankle straps
- 1 Grouppole rack

Reference: ST00400

O'LIVE RESIST TUBE STATION

Stainless steel training tube station with multiple anchor points to fix elastic tubes. It has 9 fixing points for multiple training options. It mounts vertically to any wall at desired height.

Reference: MU10200 Dimensions: 165 x 7,5 x 2,5 cm.

O'LIVE GROUPPOLE COMPACT RACK

This is a practical rack to store GroupPole accessories. Resist bars and Resist tubes that are not currently in use can be hung, with a drawer for storing belts and ankle straps. It is small in size and can be placed anywhere. It is made of a steel frame and with a hpl compact panel of soft form and nice design in line with other racks and stands of the O'live Fitness Compact Series.

	•	
Reference:	MU03200	
Dimensions:	60 x 50 x 180 cm	

O'LIVE RESIST TUBE

Elastic tube covered with a nylon sleeve to protect from rips, humidity and dehydration. Available in two lengths and 4 intensities: Extra Strong, strong, medium and light.

O'LIVE RESIST TUBE HANDLES

Ergonomic handles slightly flexible for optimal grip. They are practically indestructible and hygienic.

Reference: ST16300

O'LIVE RESIST BAR

The Resist bar consists of a 105 cm long metal bar with both ends terminated in a rotating anchor ring for the elastic cords. The bar is covered with a non-porous high density rubber which allows a comfortable and secure grip. The Resist bar is useful for toning exercises with rotation, and for stability and coordination. It is ideal for balance and explosive strength training while accomplishing a high metabolic intensity challenge in the workouts.

Reference: ST00100

O'LIVE RESIST ROPE

The Resist rope consists of a 150 cm long double braided rope with both ends terminating with an anchor ring for attaching elastics or Resist battle ropes. The Resist rope improves grip strength while the user is performing core training drills and multi-functional movements. The Resist rope is useful for toning exercises with rotation, and for stability and co-ordination. It is ideal for balance and explosive strength training while accomplishing a high metabolic intensity challenge in the workouts.

Reference: ST18300

O'LIVE RESIST BELT

The Resist belt increases the number of available exercises during a training session. It incorporates a buckle fastener which allows a quick and easy attachment. Its metal rings safely anchor the elastic cords; they incorporate neoprene around them for greater user comfort. Working with the belt will give you a wider variety of exercises in your workouts and will allow you to perform exercises like squats in its many variants, adding new challenges and developing new skills.

Reference: ST00600

O'LIVE RESIST HARNESS

Universal and adjustable harness padded for comfort. It features a buckle behind the chest and includes fixed anchor rings on the back. Its design allows use in a variety of exercises.

Reference: EN11800

O'LIVE RESIST PULL BELT

The Resist pull belt can be used for the heaviest loads and the most energetic training. It is designed for movement in any direction up to 240° (frontal and lateral) with no tension on the adjusting buckle. It is padded with neoprene for comfort. It can be used with Resist battle ropes, Resist tubes, straps or any Speed sled.

O'LIVE RESIST ANKLE STRAP

The ankle strap increases the number of available exercises during a training session. It has a buckle fastener which allows a quick and easy attachment. Its metal rings safely anchor the elastic cords. Working with the ankle strap will provide you with a wider variety of lower extremity exercises in your workout and will allow you to exercise the lower body in its many variants, adding new

O'LIVE RESIST BATTLE ROPES

Resist combat ropes are incredibly versatile products that can be used as traditional combat ropes, as speed resistors, to move backwards, lateral movements, or rotational movements.

Incorporating the resistance provided by the elastic cords you can modify the training adding traditional combat ropes and achieving muscle contraction in all three planes of motion.

The ropes are secured thanks to the nylon protective cover and they can be used for anyone regardless of their fitness level. They are 6 meters long at rest and they can reach a length of a maximum of 12 meters.

BASIC RESIST KIT

It is suitable for all users that want to develop upper body strength and power.

The set includes two 6 meter Resist battle rope, 2 anchor straps, 2 carabineers and 2 storage bags.

O'LIVE SUPERBANDS

The Superband is a very versatile tool for adding resistance to flexibility, weight lifting and bodyweight training. A higher quality band does not exist. It is ideal as an aid for doing pus-hups and dips. All the bands are made of 100% natural layered latex to ensure a long lasting product. Superbands are 104 cm long and 0.95 cm thick. Six different widths provide the current range of intensity.

X LIGHT

27 cm wide Red Superband, typically used to add strength to flexibility exercises. The inten-sity is between 2 kg and 11 kg.

Reference: EL08301

LIGHT

91 cm wide Black Superband. This is a good option for people with a body weight below 65 kg, for general use and for adding resistance to knee lifting exercises, steps and sprints. The intensity is between 2.27 kg and 15 kg.

Deference, FL00202

MEDIUM

2.86 cm wide Purple Superband. Good choice for people with a body weight between 60 and 90 kg, for general use and for push-ups. The intensity is between 4.65 kg and 22.68 kg.

Reference: EL08303

HEAVY

4.45 cm wide Green Superband. Ideal for beginners in bodyweight exercises, for athletes and expert users over 90 kg. It is also useful to add resistance to weightlifting. The intensity is between 11.3 kg and 36.3 kg.

Reference: FL08304

X HEAVY

 $6.35\,\mathrm{cm}$ wide Blue Superband. It is ideal for adding resistance to weightlifting. The intensity is between 17 kg and $54.43\,\mathrm{kg}$.

Reference: EL08305

XX HEAVY

 $8.26\,\mathrm{cm}$ wide Orange Superband. It is ideal for adding resistance to weightlifting. The intensity is between $27.2\,\mathrm{kg}$ and $68\,\mathrm{kg}$.

O'LIVE ELASTIC BAND

The elastic bands provide resistance to any exercise. They can be used by anyone regardless of age and physical condition. They are 15 cm wide and 250 cm long and are available in 4 intensities differentiated by colour.

O'LIVE RESISTANCE TUBES PLUS

Resistance tubes made from high quality natural rubber with flexible breathable and ergonomic handle. Commonly used for strength training, rehabilitation and functional training. They are nylon covered for extra protection against chafing, moisture and dehydration. They are available in different colour coded intensities. Total length of 155 cm.

- · Handle slightly flexible, breathable and ergonomic.
- Made with 100% high quality natural rubber
- Nylon covered for protection of 8 to 10 times higher.
- Greater safety against possible impacts in case of breakage.
- Four levels of resistance, perfect for circuit training.
- Colour coded for easy identification of the resistance provided.

O'LIVE LIFTING CHAINS

The use of chains to add resistance gradually increases the load during lifting. Studies have shown that greater force is performed during the third part of the lift. Using chains that add strength in this third part of the motion does not interfere with the lowest resistance in the initial part, but helps enhance the movement in question more easily without being held back by the weakness that appears in the initial part.

The Chains are made of galvanized steel. Their length is 180 cm. and include Olympic bar clips. They are supplied in pairs.

Reference:	PL15501	PL15502
Weight:	12 kg.	24 kg.

O'LIVE PRO-STYLE BARS RACK

Rack made of oval tube suitable for storing 5 Pro-Style weight bars. *Weight bars not included.*

Reference:	MU07400
Capacity:	5 bars
Dimensions:	90 x 60 x 134 cm
Colour:	Grey

The O'live Olympic bars are brushed steel bars with a rotating sleeve with high quality bearings. These are basic bars for general exercises in a fitness room/environment. They are not suitable for Crossfit, Powerlifting, weightlifting, etc. They are suitable for 50mm diameter discs.

- The brushed steel finish is more wear resistant and comfortable to touch.
- •The sleeve rotation with bearings is smoother and more resistant.
- •The rubber end cap prevents and protects the bar from scratches.

Description	Reference	Dimensions	Weight
1- Olympic bar	PL14403	ø 30 mm x 220 cm	20 kg.(max. load 680 kg)
2- Olympic bar	PL14402	ø 30 mm x 183 cm	15 kg.
3- Olympic bar	PL14401	ø 30 mm x 153 cm	13 kg.
4- Super Ez Olympic bar	PL13702	ø 28 mm x 120 cm	10 kg.
5- Ez Olympic bar	PL13500	ø 28 mm x 120 cm	8 kg.

7- Short Olympic bar	PL14102	ø 28 mm x 51 cm	4,5 kg.

O'LIVE OLYMPIC ELITE BAR

High quality Olympic bar with a shaft treated with black oxide, and hard chromed sleeve with rotation through 4 needle bearings that allow a smooth rotation and guarantee a high level of resistance. The bar's diameter is 50 mm Olympic standard and its maximum load is 680 kg. These are quality bars suitable for Crossfit and Powerlifting.

Reference:	PL18200
Dimensions:	218 cm x 28 mm.
Weight:	20 kg

O'LIVE OLYMPIC BAR RACK

Rack made of steel tube with capacity for 8 Olympic bars. Its compact design allows for better space utilisation. It comes with nylon protections to prevent bar deterioration. *Olympic bars not included*.

Reference:	PL18800
Dimensions:	40 x 40 x 14 cm.
Colour:	Light Grey

OLYMPIC COLLARS

O'LIVE SPRING COLLAR

Chrome Collar with plastic ends for 50mm diameter bars. They are supplied in pairs. Reference: PL16900

O'LIVE SPRING COLLARS 90°

Nickel collar with 90 ° tilt for 50mm diameter bars. The inclination is useful to avoid damage when being fixed to the bar and this is down on the floor. They are supplied in pairs. Reference: PL16800

O'LIVE TURN PIN COLLARS

These bar collars provide a greater safety without sacrificing speed or effectiveness. It can be quickly locked by pressing the latch. It is for bars measuring 50 mm in diameter.

Reference: PL16700

MUSCLE CLAMP

Solid plastic collar for 50mm diameter bars. The closure is done by turning the latch quickly. It provides rubber inserts for a secure attachment without damaging the bar. They are supplied in pairs.

Reference: PL17202

LOCK JAW PRO

Collars with solid nylon core specially designed for Olympic movements. Includes rubber inserts for extremely secure attachment without damaging the bar. The lock incorporates a pressure spring which makes it very easy to manipulate with only one hand. They are supplied in pairs. Reference: PL17100

OLYMPIC DISCS

When determining what discs are most suitable, we have to take into account what will they be needed for and what environment they will be used in.

O'live Rubber Discs. Currently rubber discs are the preferred choice for most users. They have a nice to touch coating of high quality shock resistant rubber. Their ergonomic design includes special handles which facilitate gripping. They also include a tool to facilitate disc removal from the bar and to pick them up from the floor. The inner hole is the 50 mm and is protected by a steel ring which allows a smooth rotation of the disc on to the bar. For easy weight identification the discs show the weight embossed and coloured.

O'live Bumper Plates. Bumper plates, also known as natural rubber discs, are built using solid natural rubber. Its main advantage lies in the fact that they can be used in specific weightlifting and Crossfit exercises in which discs can be dropped without fear of breakage. All weights are the same diameter and have a ring in the inside hole to allow a smooth rotation of the Olympic bar.

O'live Iron Discs. They are the most economical option available today. They are made from cast iron and then painted. Weight is embossed for easy identification. The inner hole is 50 mm. They look stern but authentic at the same time, since these were the first discs used around the world. Their use is common in Olympic bars, racks and benches, being the preferred option for sports clubs, schools or when the price is more important.

O'LIVE BUMPER PLATE RACK

This is a steel rack ideal for storing bumper plates. Its removable plate dividers allow for a customisation of the spacing required between plates. The standard space between the dividers is 100mm and it can be moved up to 230mm by removing every second divider.

Reference:	PL18300
Dimensions	1200 x 480 x 330mm.
Colour:	Light grey

KETTLEBELLS

Kettlebell are weights made of iron that resemble a cannonball with a handle. Its unique shape results in their centre of gravity to be slightly offset from the grip, making them ideal when performing ballistic exercises.

The Kettlebells are used for different fitness goals such as losing weight, gaining muscle, or for strength development. They are one of the most flexible and effective functional training products available today. are used in training programs that include explosive movements which combine cardio and strength workouts. Thanks to its displaced centre of gravity the kettlebells are harder to control, resulting in increased demands of agility, trunk stabilization and co-ordination.

O'live Fitness offers three different types of Kettlebells. Depending on their design and their usage some models can be more suitable than others.

O'live Cast Iron Kettlebells. They are made entirely of cast iron with a paint finish. Their handle is slightly grooved, and they look rather coarse but weight identification provided by the colour makes them very easy to use. They have a totally flat base that affords them with great stability, making them very useful for certain exercises: for example, they are perfect for Crossfit applications and in traditional fitness rooms.

O'live Vinyl Kettlebells. They are also made of cast iron, but they incorporate a colour coating which simplifies weight identification and provides extra protection with a less aggressive design. For these reasons the vinyl Kettlebells are commonly used in studio class activities or in female environments.

O'live Rubber Kettlebells. They feature a chromed steel handle and rubber coating which is stronger than vinyl. They have an elegant look that can be combined with other products from O'live Fitness such as dumbells and discs, providing a unified free weight area. The handle is completely smooth, and soft to the touch. They are commonly used in fitness centres and in personal training spaces.

O'LIVE CAST IRON KETTLEBELLS

- · Manufactured in solid cast iron, perfectly balanced.
- · Available in weights of 4 kg. up to 32 kg., with 4kg increments.
- The flat base allows for greater stability in floor exercises.
- Optimal grip design that provides extra comfort and safety.
- The design of the handle allows working with both hands.
- Easy painted weight identification.

Consists of 10 Cast iron Kettlebells: 1 u. of 4 kg. / 1 u. of 8 kg. / 1 u. of 12 kg. / 2 u. of 16 kg. / 2 u. of 20 kg. / 1 u. of 24 kg. / 1 u. of 28 kg. / 1 u. of 32 kg. Kettlebell Rack ref: MU06400

Reference: ST17500

KIT B

Consists of 5 Cast iron Kettlebells: 1 u. of 4 kg. / 1 u. of 8 kg. / 1 u. of 12 kg. / 1 u. of 16 kg. / 1 u. of 20 kg. / Kettlebell Rack ref: MU05300

Reference: ST17700

KIT C

Consists of 10 rubber Kettlebells: 1 u. of 4 kg. / 1 u. of 8 kg. / 1 u. of 12 kg. / 2 u. of 16 kg. / 2 u. of 20 kg. / 1 u. of 32 kg. / 1 u. of 32 kg. Kettlebell Rack ref: MU06400

Reference: ST17600

KIT D

Consists of 5 rubber Kettlebells: 1 u. of 4 kg. / 1 u. of 8 kg. / 1 u. of 12 kg. / 1 u. of 16 kg. / 1 u. of 20 kg. Kettlebell Rack: MU05300

Reference: ST17800

CABLE MACHINE ATTACHMENTS

Accessories for cable or pulley machines that provide different grip options. They have a brushed steel surface, which is more durable than chrome. Ergonomic and pleasant to the touch PU handles, more durable than standard rubber ones.

1. Curl Lat Bar.	PL13602
2. Lat bar 91 cm.	PL13801
3. Lat bar 122 cm.	PL13802
4. Lat bar pro 61 cm.	PL13901
5. Lat bar pro 96,5 cm.	PL13902
6. Revolving triceps & biceps bar.	PL14000
7. Single Handle.	PL14600
8. Multi exercise bar.	PL15901
9. Multi exercise bar- V shaped	PL15902
10. Short rowing handle.	PL16000
11. Revolving triceps bar.	PL16100
12. Single pull rope	PL16200
13. Fixed Triceps bar.	PL16300
14. Double pull rope	PL16600

O'LIVE ACCESSORIES RACK

Compact one-piece rack suitable for storing up to 15 handles. *Handles not included.*

Reference:	MU08200	
Dimensions:	50 x 50 x 125 cm.	
Colour:	Grey	

ACCESSORIES

O'LIVE LEATHER ANKLE STRAP

Black leather ankle strap with soft inner padding for extra comfort. It is useful when used with pulley cable machines.

Reference: PL18500

O'LIVE SINGLE HANDLE

The O'live single handle is made of nylon and rubber tape and it is useful when used with pulley cable machines.

Reference: PL18400

ACCESSORIES

FUNCTIONAL VEST

Functional vest with front and rear rings are useful for use in dual cable machines or sleds.

Reference: EN37800

LOF ANATOMY WEIGHT LIFTING BELT

- Manufactured with anatomical shaped neoprene.
- Big Velcro closure with sliding buckle
- Washable

Reference:	PL17601	PL17602	PL17603

Colour:	Black			

O'LIVE NECK PROTECTOR

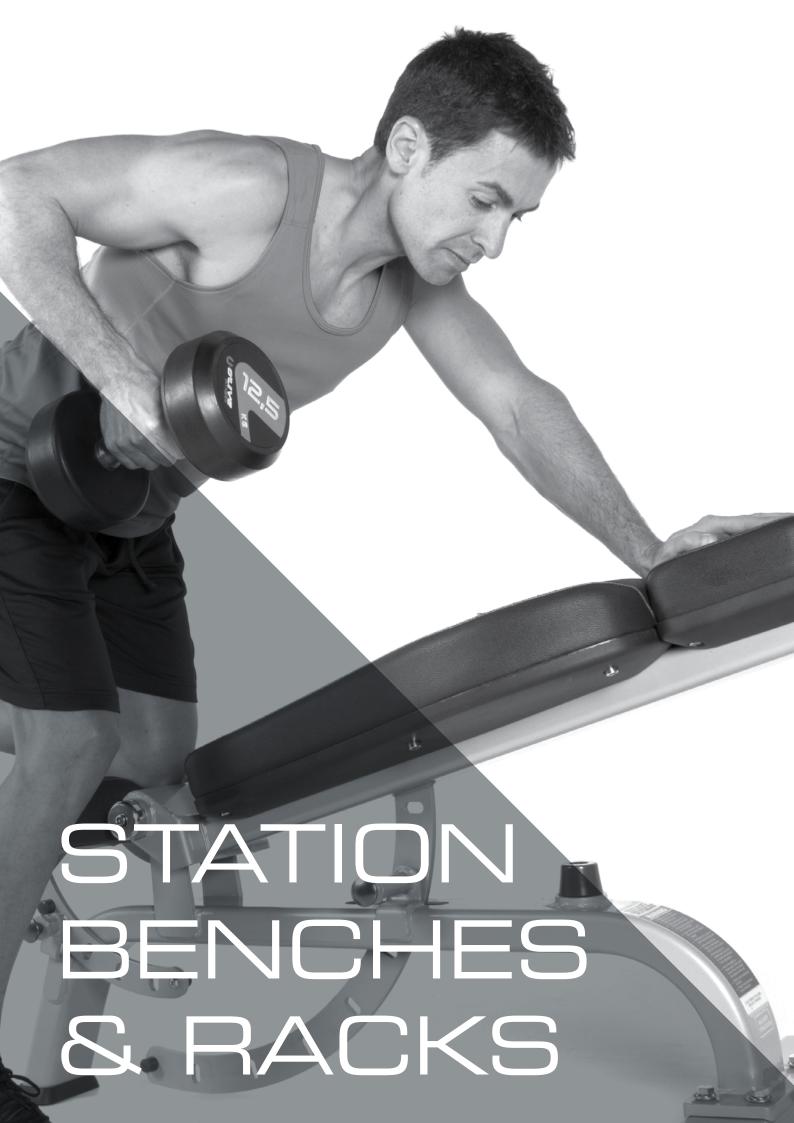

Padded cylinder designed to protect neck and shoulders during training with the lifting bar. It is made of soft and durable material awarded with the Sanitized certificate. It fits any size bar.

	· · · · · · · · · · · · · · · · · · ·	
Reference	e: EN05500	
Dimensio	ns: 50 cm x 8 cm diameter.	
Colour:	Black	

O'LIVE DUMBELL GRIPS

Sweat resistant Dumbell grips made of high quality vinyl. They are non-slip and incorporate a wear prevention fabric in the inside. The price includes a pair.

R SERIES

(STATIONS, BENCHES & RACKS)

The **R series** of stations, benches and racks are designed to provide high performance features to advanced users without intimidating the new ones; all thanks to their user friendly shapes. It is called **R Series** due to the **R**ectangular tube with rounded edges which provides rigidity as well as a great design. Another features are dense padding, staintless steel discs pegs and no metal supports for maximum protection and durability.

All the equipment in the **R Series** is engineered to provide good accessibility, proper biomechanics and to improve durability.

O'LIVE RS DUMBELL RACK

The RS dumbell rack incorporates loading spaces with rubber to protect the ends of the dumbells. This rack can store only 10 pair of chromed dumbells.

Ref.:	PL18900
Dimensions:	65 x 145 x 100 cm
Capacity:	From 1 kg up to 10 kg of chrome dumbells.

O'LIVE RS PRO STYLE DUMBELL RACK

The Pro-style RS dumbell rack incorporates rubber slots to protect the ends of the dumbells. It is a very useful item in terms of storage capacity as it can accommodate the Pro-style dumbells of up to 37,5 kg taking up minimal floor space.

Ref.:	PL19100
Dimensions:	75 x 245 x 81 cm
Capacity:	10 pairs of Pro style dumbells until 37,5 kg.

O'LIVE RS PROSTYLE BAR STAND

The Pro-style bar support is a very effective stand in terms of storage capacity as it takes very little space. The plastic protections on the brackets and frames help protect the bars and the brackets.

Ref.:	PL20800
Dimensions:	71 x 99 x 150 cm.

O'LIVE RS OLYMPIC DISCS RACK

The RS discs rack is very useful to store Olympic discs in a minimal floor space. It is robust and stable and incorporates rubber protectors. The discs pegs ara stainless steel for maximum durability.

Ref.:	PL19000
Dimensions:	56 x 70 x 125 cm

O'LIVE RS ACCESSORIES RACK

The RS accessories rack is a very effective tool to accommodate different handle types. It has a very useful upper tray to store other accessories.

Ref.:	PL19200
Dimensions:	118 x 74 x 106 cm

O'LIVE RS ABDOMINAL BENCH

This is a fundamental component in the fitness room of any sports centre. It is specifically designed for abdominal work and it is widely used by users. It includes 6 decline positions from 8 to 33 degrees. It is an ergonomic bench, with an oversized backrest and padded rolls for greater adaptability and user comfort.

Ref.:	PL20600
Dimensions:	132 x 68 x 114 cm

O'LIVE RS LUMBAR BENCH

The lumbar bench allows users to exercise an area of their body that is often forgotten. It is durable and easy to use thanks to its sliding mechanism, which allows full adjustment to any user size.

Ref.:	PL19500
Dimensions:	114 x 90 x 75 cm

O'LIVE RS STRETCH STATION
The stretch station is light and small in size. Users can safely and comfortably work on flexibility of the back and buttocks among other muscles. It is suitable for use both before and after the training.

Ref.:	PL20300
Dimensions:	140 x 47 x 123 cm

O'LIVE RS KNEE RISE

The knee rise station provides effective core training by raising knees and by permitting dips and also working the triceps. It is stable and robust. Its padding allows a comfortable and effective training.

Ref.:	PL19600
Dimensions:	71 x 112 x 160 cm

O'LIVE RS FLAT BENCH

The flat bench press is a basic component in any fitness centre; its three leg shape makes it stable and versatile as it allows complete freedom of movement to the user.

Ref.:	PL20700
Dimensions:	138 x 56 x 45 cm

O'LIVE RS ADJUSTABLE BENCH PRESS

The versatility and durability of the adjustable bench press make it a key element in any sports facility. The saddle and the backrest can be adjusted for greater ergonomics and a variety of exercises. The padded backrest is set to XX positions from a flat position to 90°. The padded saddle can also be adjusted in 15 degree increments, from a flat position to a 45° angle.

Ref.:	PL20500
Dimensions:	162 x 76 x 81 cm

O'LIVE RS BICEPS BENCH PRESS

The ergonomic design of this biceps bench press can accommodate the bar at two levels and can adjust the saddle at different heights to adapt to most users. Designed for a long life, it takes up very little space and incorporates plastic protections to prevent the bar and the frames from wearing.

Ref.:	PL20400
Dimensions:	132 x 84 x 97 cm

Fundamental component of any free weight area in any sports facility. The Olympic chest bench press has been designed and manufactured with special focus on quality and detail. Its padding is designed to provide comfort and control. It includes two support bars for ease of use. It is made of plastic material to prevent the bar from wearing.

Ref.:	PL19700
Dimensions:	117 x 173 x 123 cm

O'LIVE RS SQUAT CAGE

The squat cage is a fundamental unit in most sports facilities. It is very durable and designed to offer a great variety of exercises safely. It includes protections on the supports to prevent friction as well as wear and tear, and it can be adjusted in up to 12 different positions. It includes a non-slip squat bar.

Ref.:	PL19300
Dimensions:	150 x 126 x 230 cm

O'LIVE RS SQUAT RACK

The squat rack has been designed and manufactured based on the criteria of quality and attention to detail of all O'live products. Its frame is sturdy and stable and includes supports for disc storage. It includes protections on the brackets and rails to prevent friction as well as wear and tear.

Ref.: PL1	3 100
Dimensions: 71	x 99 x 150 cm

O'LIVE RS ROWING

The rowing machine is ideal for working the muscles of the back. It has a lever with two different grip positions for versatility, and the anatomical design of the padding facilitates the workout.

Ref.:	PL19800
Dimensions:	185 x 95 x 118 cm

O'LIVE RS SEATED CALF

Its robust and stable design together with the handles and the release lever of this calf station allows the user to train safely. The weight discs support is angled for easy loading and unloading, and the pad for the thighs is adjustable to accommodate all types of users.

Ref.: PL19900
Dimensions: 145 x 53 x 100 cm

O'LIVE RS MULTIPOWER

The Multipower O'live bar starts from a weight below 7 kg. It is ideal for users to safely carry out a wide variety of exercises both of the upper and the lower body. Its design can freely accommodate benches as it does not have a transversal support at ground level.

Ref.: PL20000 Dimensions: 222 x 144 x 232 cm

O'LIVE RS ANGLED LEG PRESS

Angled press to work the lower body. It is soft and durable thanks to the mechanism which incorporates linear bearings. The backrest is adjustable for greater user comfort.

Ref.:	PL20200			
Dimensions:	210 x 165 x 130 cm			

O'LIVE RS DUAL MULTIFUNCTION

The Dual Multifunction Training Station consists of two separate towers of 90 kg. with adjustable pulleys, which can provide resistance strength training with complete freedom of movement, and can improve co-ordination and stability. Its compact design, with smooth lines, is easy to use and it can be adapted to most training premises.

Ref.:	PL20100
Dimensions:	175 x 112 x 233 cm

COMBAT

O'LIVE BOXING GLOVES

- · Suitable for fitness training.
- · Made of high quality synthetic leather.
- Durable and strong Velcro fastening.
- · Machine padded cotton, ensuring equal density and thickness.
- · Narrow thumb fitting, to avoid possible injuries.
- · Comfortable & soft on the back of the hand and with uniform padding.
- One size fits all.

 Reference: Fl03100

 Colours: Black & White

O'LIVE MMA LIGHT BOXING GLOVES

- Suitable for training boxing, martial arts, kung fu, etc.
- Thick cushioning layer for an effective workout without injury.
- Made of high quality synthetic leather.
- Comfortable to use.
- · Ventilated for effective moisture removal.
- One size fits all.

Reference: Fl03000 Colours: Black & White

O'LIVE BAG BOXING GLOVES

- · Suitable for training with the punching bag.
- Thick cushioning layer for an effective workout without injury.
- Made of high quality synthetic leather.
- · Exact radius and uniform padding.
- · Ventilated for effective moisture removal.
- Thumb separated from the mitten for greater flexibility.
- One size fits all.

Reference: Fl03200 Colours: Black & White

O'LIVE BOXING PAD

- · Made of high quality synthetic leather.
- Fastened with braided leather.
- High stability due to the rear top and bottom fastening.
- Thick and reinforced handle for greater durability.
- Strong and resistant Velcro closure.
- Filled with EVA foam, prevents and resists deformation.
- Dimensions: 42 cm x 20 cm x 10 cm.

Reference: FI03500
Colours: Black & White

O'LIVE BOXING CURVED MITTS

- Stuffed with high-compression foam.
- Made of high quality synthetic leather.
- · Arched design for improved ergonomics.
- Dimensions: 25 cm x 20 cm x 5.5 cm.

Reference: Fl03400
Colours: Black & White

O'LIVE BOXING HAND WRAP

- · Made of pure cotton.
- 2.5 meters long by 5 cm wide.
- · Soft and comfortable.
- · Nylon Velcro fastener.

Reference: Fl03300 Colour: Black

O'LIVE FREE STANDING PUNCHING BAG

- Free standing punching bag suitable for cardio boxing.
 Allows a slight flexion of 30° for shock absorption.
- Bag Dimensions: 38 cm x 115 cm.
- Overall Dimensions: 69 cm x 170 cm.
- Filled with water or sand reaching a weight of 75 kg.

Colours:	Black	Black	Black

O'LIVE BAG WALL BRACKET

- Professional steel bracket suitable for punching bag suspension.
- It is screwed into the wall at the desired height.
- · Weight capacity of 100 kg.
- Dimensions: 90 cm x 50 cm.

Reference:	FI04100	
Colour:	Grey Bluish	

COMBAT POSTER O'LIVE

Laminated 60 x 45 cm poster.

Reference: PO06000

O'LIVE BOXING SPEEDBALL

- Made of high quality synthetic leather.
- Filled with latex with leather stitching for greater strength and stability.
- The size of the speedball is equipotential, improving speed and direction accuracy.
- Strong and stable to shock.
- Dimensions: 24 cm x 17 cm.

Reference: Fl04300 Colours: Black

O'LIVE BOXING PUNCHING BALL

- Made of high quality synthetic leather.
- The size of the ball is equipotential, improving speed and direction accuracy.
- Strong and stable to shock.
- Includes quick rebound elastic ropes.
- · Manually stitched with leather braiding.
- Dimensions: 21 cm x 21 cm.

Reference: Fl04200 Colours: Black

O'LIVE SPEEDBALL PLATFORM

- Steel and wooden bracket suitable for speedball.
- It is screwed into the wall at the desired height
- · Incorporates swivel.
- · Indicated to train speed.
- Dimensions: 60 cm x 3 cm.

Reference: FI03900

O'LIVE PUNCHING BAG STATION

- ${\boldsymbol{\cdot}}$ Professional station for two punching bags.
- · Robust steel frame, firm and stable.
- It does not require floor fixing.
- · Allows two users simultaneously.
- Dimensions: 3.2 m x 1.4 m x 2.4 m.

Reference: Fl04000 Colour: Grey Bluish

O'LIVE BOXING STATION

- Professional boxing training station.
- · Robust steel frame, firm and stable.
- It does not require floor fixing.
- Allows three users simultaneously.
- It can suspend a bag, a speedball and a punching ball.
- Dimensions: 2 m x 1 m x 2.5 m.

Reference: Fl04500 Colour: Grey Bluish
