The essential guide for all
your facility needs

At Aerobic & Fitness we have spent more than thirty years working alongside professionals in the sector to turn ideas into spaces that not only function, but make a real difference. Throughout this time we have evolved alongside the market, understanding its changes, anticipating trends and adapting our offering to meet the real needs of each client.

Our experience has taught us that every project is unique. That is why we do not believe in standard solutions. We analyse every space, every business model and every type of end user to design proposals that combine performance, functionality and an engaging experience. Our aim is not simply to equip a facility, but to help build environments that generate value from day one.

We accompany our clients throughout the entire process. From the early conceptualisation stages, through space planning, product selection and layout optimisation, right through to final installation and launch. This integrated approach allows us to ensure that every decision makes sense within the whole and contributes to the success of the project.

We work with a clear vision. We understand that behind every installation there is a business, an investment and a set of expectations. That is why we focus on what really matters: creating spaces that attract, retain and help end users achieve their training, health or wellbeing goals.

Whether it is a new opening, the renovation of an existing facility or the improvement of an installation looking to take the next step, we approach every project as an opportunity for growth. We commit to every detail with the aim of delivering solutions that stand the test of time and support the evolution of each client.

Our work goes beyond the product. It is a combination of knowledge, advice and closeness. A way of understanding fitness from a professional perspective, where every project becomes a reflection of the identity of those who drive it and a tool for generating real results.

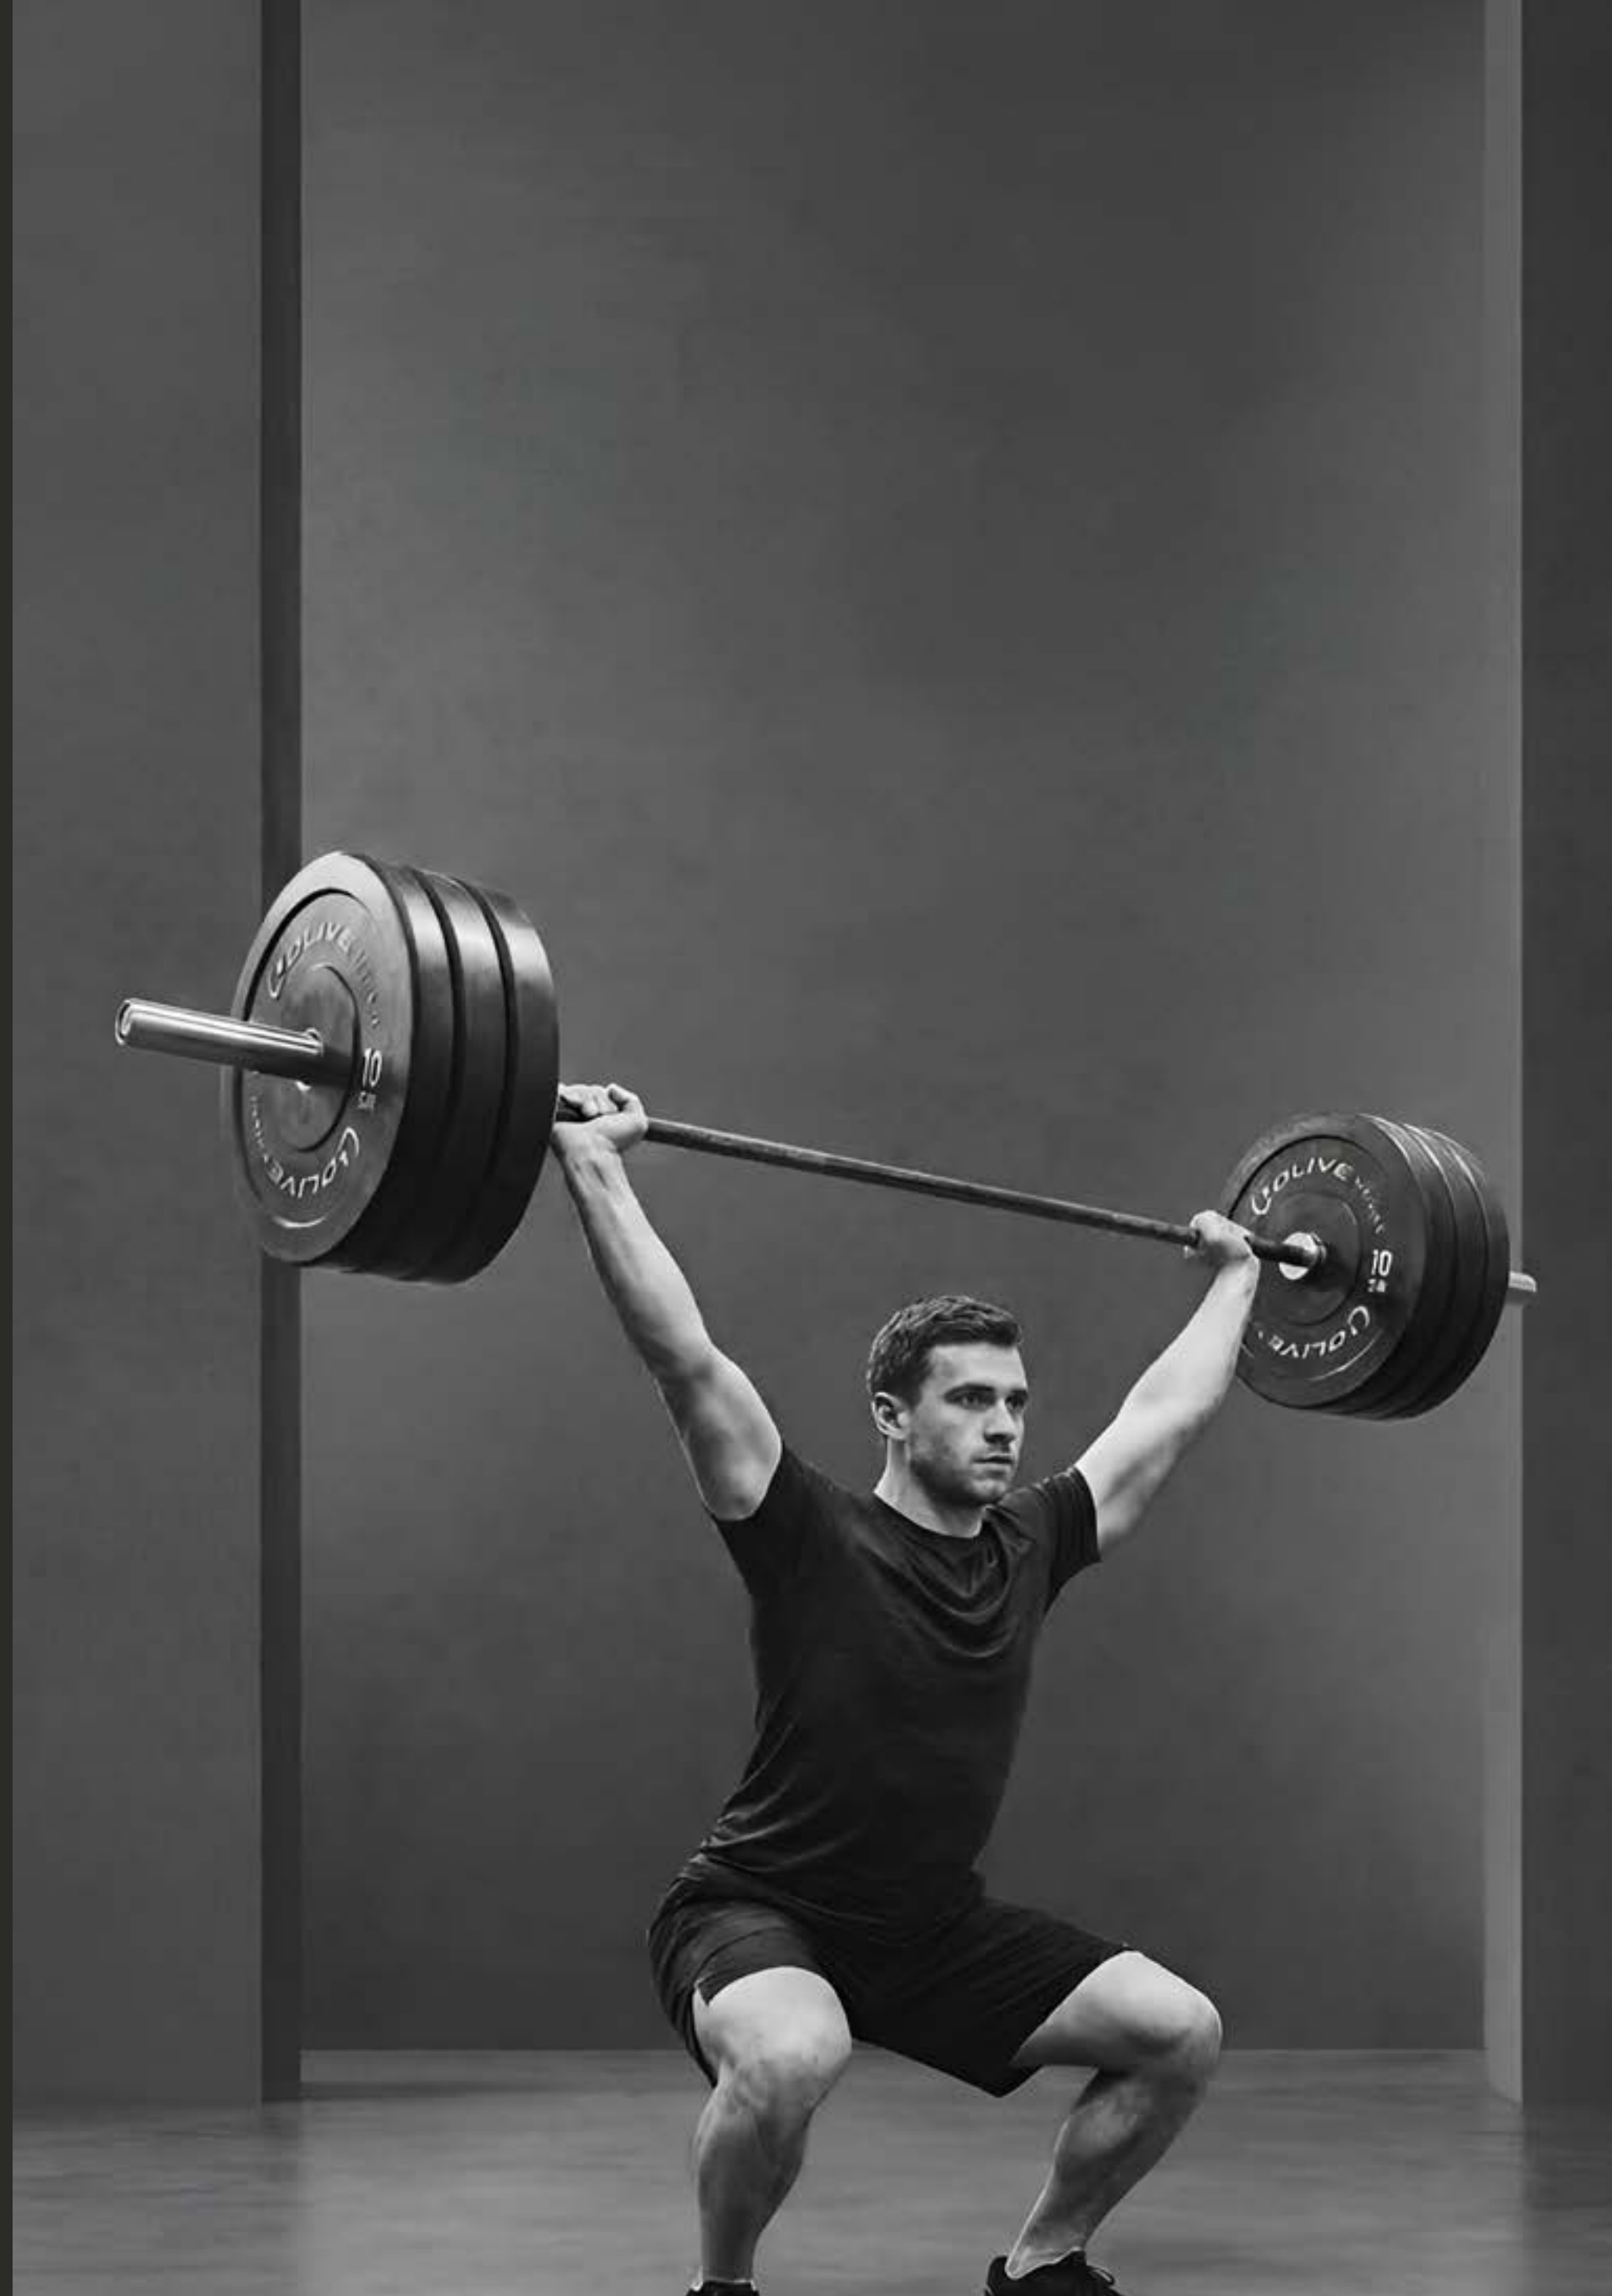

We invite you to find out how we work and to discover some of the projects that are already helping to transform the sector.

Storage products are supplied without the items shown in the images, unless expressly stated in the product description.

The images included in this catalogue are for illustrative purposes and may show slight variations from the final product.

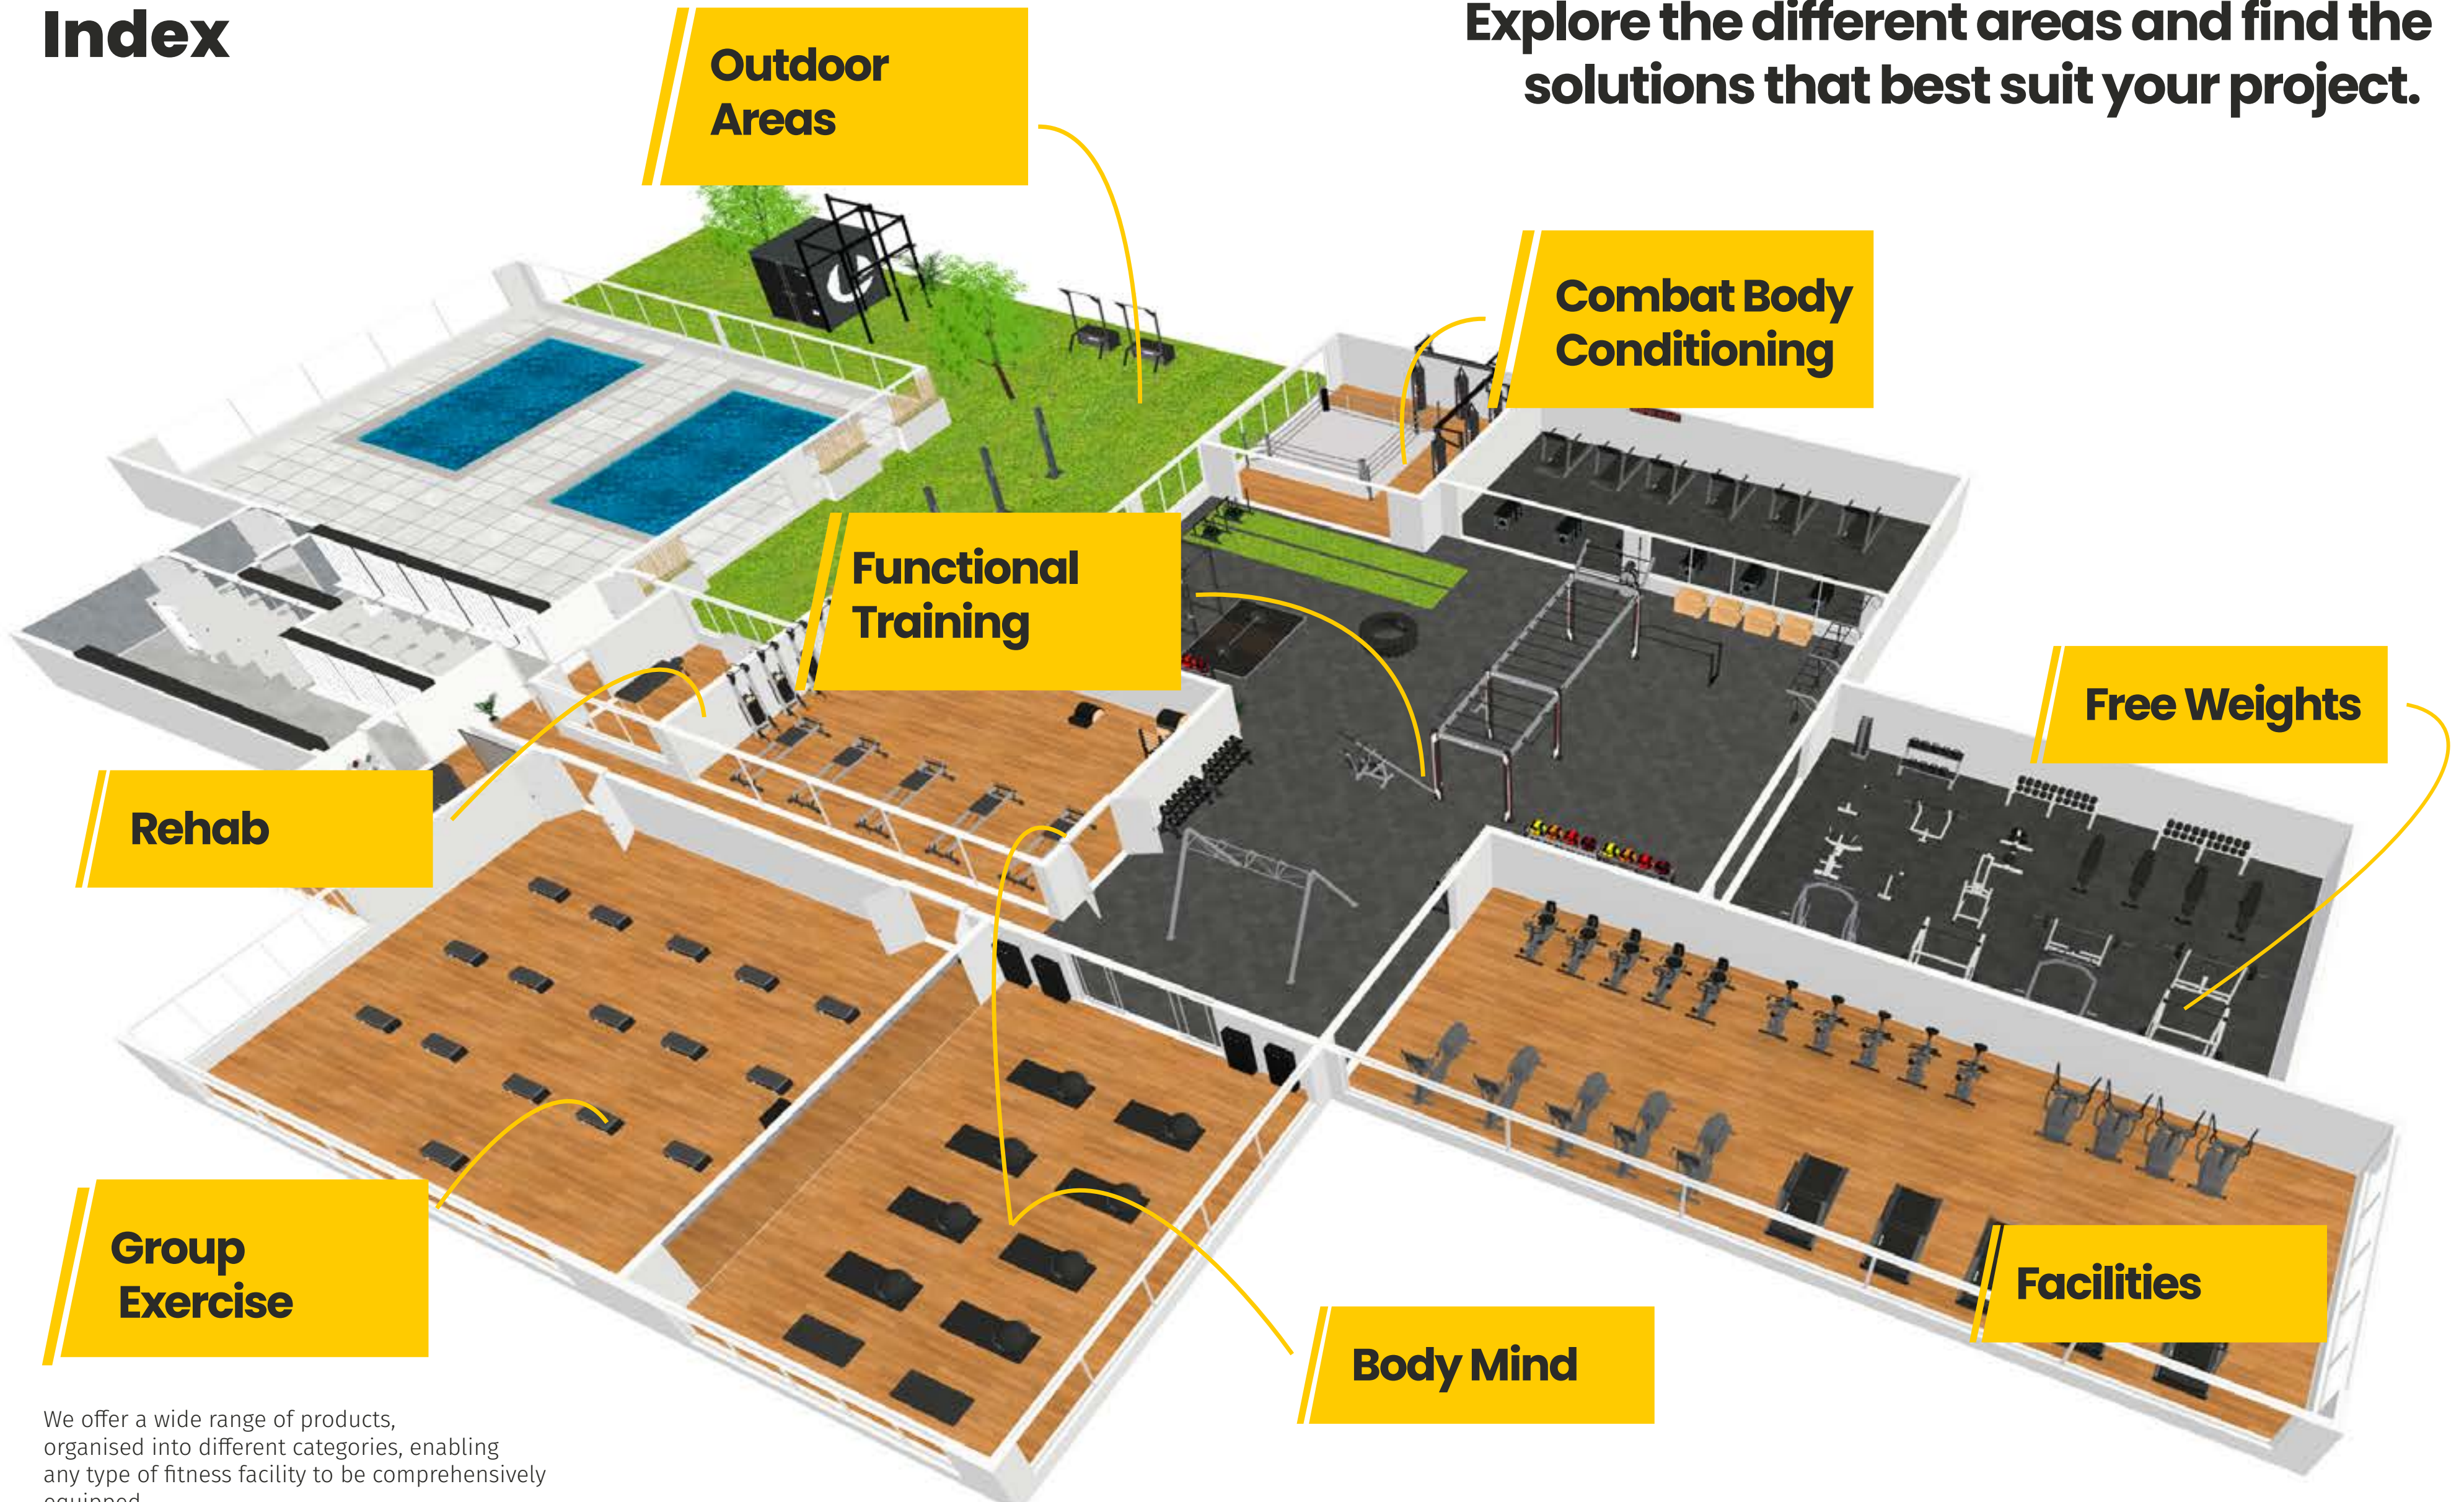

Furniture or products designed for wall fixing do not include the fixings required for installation, as these must be selected according to the type of surface.

NEW EVOQ

The EVOQ Pump O'Live Disc Set redefines strength training in group exercise classes and functional areas thanks to its innovative, multi-function ergonomic design.

Each disc features a perfectly balanced central handle, allowing them to be used as standalone dumbbells for unilateral exercises or as accessories in strength circuits. They also include two external easy-grip handles, ideal for two-handed movements such as kettlebell-style swings, overhead presses or dynamic carrying movements.

Its premium TPE (Thermoplastic Elastomer) coating provides a surface more resistant to wear than traditional rubber, completely odour-free and with a soft yet firm feel, enhancing the user experience in high-rotation training sessions.

This set is designed as an all-in-one solution for pump-style classes, functional training, toning sessions or HIIT circuits.

PLATES SET EVOQ PUMP O'LIVE FITNESS

Ref: ST26200.00

Set composition (18 kg total)

1 pair of 1.5 kg discs

1 pair of 2.5 kg discs

STANDARD PUMP BAR O'LIVE FITNESS 130 cm

Ref: ST26400.01
Dimensions: Ø 25 mm x 130 cm
Includes: Pinzas

The O'Live Standard Pump Bar Ø 25 mm x 130 cm is designed for group exercise classes, functional training and Pump-style toning sessions, offering a perfect combination of ergonomics, safety and durability.

Manufactured from chrome-coated steel, it guarantees structural resistance and protection against wear and corrosion in intensive-use environments. It is designed for discs with an inner diameter of 25 mm, such as EVOQ discs, ensuring compatibility and a secure fit.

It features a 30 mm diameter high-density NBR foam-covered grip, which provides greater comfort during extended sessions, improves grip and reduces fatigue in the hands and forearms.

It has 20 cm of usable loading space per side, allowing a balanced weight configuration according to the user's level.

Includes a pair of 25 mm collar clamps, guaranteeing secure disc fixing during dynamic or repetitive movements.

PROFESSIONAL STEP PLATFORM O'LIVE
