PUSH BUTTON TECHNOLOGY

User-friendly, color-coded push-button technology to engage desired resistance load, with selected resistance displaying on screen in real-time.

Featuring 4 resistance load levels: 22-143 lbs (10-65 kg)

- » Green button 22 lbs (10 kg)
- » Blue button 33 lbs (15 kg)
- » Red button 44 lbs (20 kg)
- » White button 44 lbs (20 kg)

While the resistance is still controlled by springs, it provides enhanced user safety by keeping the springs encased within the Smart Spine $^{\mathbb{M}}$.

SMART SPINE™

The RX Smart Spine™ demonstrates how NordicTrack has elevated the overall design of the traditional reformer. Acting as an additional platform to perform exercises, it alleviates the previous user hazard seen on other reformer apparatus by eliminating exposed springs and open gulley.

Providing an improved and efficient footprint, the Smart Spine™ encases both the RX spring resistance and next-generation tracking technology.

INFINITY FOOTBAR

The RX infinity footbar maximizes training and class programming potential with 28 different locking positions.

It seamlessly glides to the very back of the RX Smart Spine™. It's easily adjusted by pressing down on the foot pedal, located on both sides of the footbar.

The RX footbar is also fully functional in glide mode (not locked), supporting and promoting increased range of movement.

An optional grip support can be included depending on user preference.

ERGONOMIC HANDLES

Ergonomically designed handles are positioned on all four corners of the RX carriage for safety and functionality.

ELITE TRAINERS

Equipped with a tilting 24" HD touchscreen, Reform RX-S and Reform RX bring industry world-class trainers leading instructors into a variety of fitness spaces, at any time.

75+ ON DEMAND WORKOUTS

An ever-growing library of 75+ on-demand, expert-led workouts to keep users engaged from start to finish.

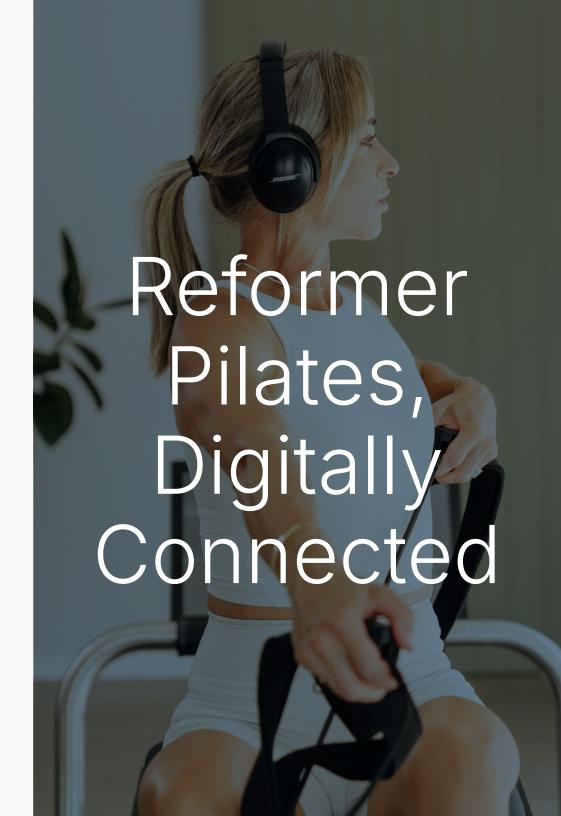

USER-FRIENDLY NAVIGATION

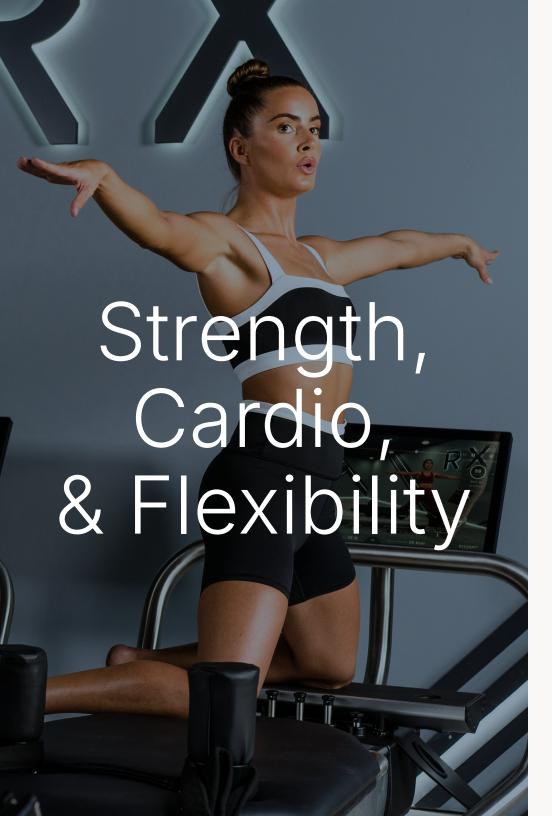

Users can choose their workouts based on their own preferences, from class duration, difficulty level, body focus, additional equipment, preferred instructor, and music genre.

REAL-TIME & POST-WORKOUT FEEDBACK

Unique, built-in user tracking technology housed in the Smart Spine™ provides biometric feedback on calorie consumption, power output, and heart rate to enhance user accountability and motivation.

BLUETOOTH® COMPATIBLE

Equipped with built-in Bluetooth® connectivity to accommodate headphone/earphone device pairing for a fully immersive experience.

HEART RATE MONITORING

The RX is compatible with heart-rate monitoring devices. When connected, the user's heart rate will be displayed on the workout screen and overall heart rate will be presented in post workout analysis. (Heart rate monitor sold separately)

Education

Investing in Pilates education ensures your team can deliver effective, engaging sessions that elevate the client experience and maximize your commercial Reformer's value.

Training goes beyond equipment familiarity; it equips instructors with the skills to design and execute programming that drives results, builds confidence, and encourages repeat participation.

Well-educated staff create consistency and a premium experience, helping your business stand out in a competitive fitness landscape. Every Reformer installation includes a guided video tutorial - your first step toward mastery.

Pilates Foundation

For studios or trainers new to Reformer Pilates equipment, this **2-hour** orientation provides a strong foundation in how the Reformer platform works.

- >> Led by a certified Master Trainer at your location
- >> Covers machine functions, safety checkpoints, and key adjustments
- » Introduces the different training levels and class formats available on the platform
- >> Ideal as a first step before progressing to full program training

Outcome: Confidence in setting up and safely using NordicTrack equipment with your clients. Reference documents via QR code.

Pilates Elevate

Designed for trainers who want to confidently deliver structured Reformer Pilates classes, this **8-hour** immersive training goes beyond the basics.

- >>> Full-day in-depth training session
- >> Learn how to design and structure engaging classes
- » Receive 3 ready-to-teach class plans
- » Access Reform RX digital assets for ongoing support
- Includes a detailed training manual for easy reference
- >> Guidance from a Master Trainer to refine teaching technique and class flow

Outcome: Be fully equipped to teach professional, results-driven Reform Pilates classes with confidence and creativity. Certificate of Completion.

Maintenance & Servicing

In our unwavering commitment to ensuring the optimal performance and longevity of our products and services, Freemotion goes the extra mile in providing proactive support and maintenance.

Freemotion is proud to offer a 72-hour service window in the event of any concerns arising within the first 6 months of operation. This rapid-response service ensures minimal disruption and keeps our products and services running smoothly. In addition to this, scheduled maintenance checks will be conducted every 6 months, over a 2-year period, providing a proactive approach to quality assurance. These checks, performed by our expert technicians, aim to identify and address any potential issues before they impact performance. This preventative maintenance strategy ensures that you continue to deliver an unparalleled fitness experience, meeting the highest standards of excellence in both design and functionality.
