LIGHT COMMERCIAL USE

Due to constant innovation of our items, technical details of this machine may slightly differ.

TECHNICAL SPECIFICATIONS:

- Two separate towers of vertically adjustable pulleys in 30 positions.
- Adjustable double pulley system that allow exercises with complete freedom of movement, varying the position of the body while exercising.
- Work load variation system which allows a large range of movement on either side and perform them at high speed without loss of strength in any point of the trajectory (muscle strength workout).
- Includes accessories to increase training options: individual handles, press bar, wavy biceps bar/ triceps, specific bat for golf and baseball exercises, handle rope and ankle.
- Workload: 75 kg per tower.
- Optional bench (ref. INS-BCO).
- Dimensions: 118x135x205cm.
