DESIGNED TO BE EPIC

Elevating the workout standard with smart upgrades that maximize each rep's effect, Freemotion redesigned the EPIC SelectORIZED Line to meet the needs of today's modern gyms. With lower towers, a new molded seat design, Line-X® footplates for durability and safety, and contoured counterweights, the EPIC redesign resulted from extensive research and development, user feedback, and pure innovation.

EPIC SELECTORIZED

INDEPENDENT ARM MOVEMENT

Arms move independently to create single or dual exercises, depending on the user's fitness level. (Independent arm movement on the ES800, 802, 806, 807, 809, 816, 817 and 818 pieces.)

INTENTIONAL DESIGN

Give your facility the clean and modern look of the EPIC Selectorized Line. The low-profile tower provides superior benefits like accessory holders in the top cap and simple access to perform cable service.

REDUCED FOOTPRINT

The new EPIC Selectorized Line features a smaller footprint, making it the logical choice for smaller spaces or freeing up more room in larger facilities.

QUICK START MACHINE

Requiring minimal adjustments, users can begin exercising immediately with this intuitive and innovative line.

COLOR OPTIONS

Achieve the perfect look for your facility with five standard frame colors and five upholstery options. Custom frame color options also available on request.

SERVICEABILITY

The tower design allows for simple cable service.
